

**OVERVIEW**

The Riverbridge Large Cap Growth strategy was established in 1997. It is a diversified growth stock portfolio invested in 30-50 companies of large market capitalization sizes. Due to our long-term investment approach, turnover for the portfolio is low - averaging less than 20% annually. The portfolio is managed by the Riverbridge Investment Team utilizing our time-tested investment philosophy and disciplines.

**INVESTMENT PHILOSOPHY**

Riverbridge believes earnings power determines the value of a business, therefore we invest in high quality growth companies that possess the ability to build their earnings power at above-average rates for long periods of time. We define earnings power as companies achieving high returns on invested capital while possessing an enduring strategic advantage in their marketplace.

We build portfolios by identifying and buying well-managed companies we believe can maintain consistent unit growth and strong free cash flow, allowing them to finance their growth using internally generated sources of capital.

**Firm Information:** Riverbridge Partners, LLC is a Minnesota based investment advisor registered with the Securities and Exchange Commission under the Investment Advisors Act of 1940. The firm provides investment management services to institutional and individual investors. The company offers growth and income oriented investment services which it believes will provide high returns over the long term. The firm's standard fee schedule is an annual 1%.

**Composite Characteristics:** The Large Cap Growth Composite was created in October 2007 and its inception date was 12/31/1997. It is a diversified growth stock portfolio invested in large capitalization growth companies. A complete list and description of all firm composites, including broad and limited distribution pooled funds, is available upon request. The composite benchmark is the Russell 1000® Growth Index. The Russell 1000® Growth Index includes the segment of securities within the Russell 1000® Index with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Index is an unmanaged index measuring the performance of the large-cap U.S. equity universe. Composite dispersion is not presented for years with 5 or fewer accounts. The benchmark returns are gross of all fees and taxes. The composite minimum value is \$100,000.

Material risks of the strategy include stock market, business and economic development, liquidity, and foreign security risk. Leverage, derivatives, short positions and illiquid investments are not used in the strategy. As with any investment, an investor may lose money, and the strategy can underperform its benchmark. Investment in strategies is not insured by the FDIC or any other government agency.

**Calculation Methodology:** Individual portfolios are revalued daily starting 1/1/2009. Prior to that, individual portfolios were revalued monthly and intra-month when large cash flows (defined at 10%) occurred. Gross-of-fee returns are calculated net of transaction costs and gross of management fees. Until 12/31/2007, net performance was calculated by applying the maximum annual management fee of 1% to gross performance on a monthly basis. Starting 1/1/2008, net-of-fee returns are calculated net of actual investment management fees. Both gross-of-fee and net-of-fee returns are calculated gross of all withholding taxes on foreign dividends. Accruals are included in calculations. The dispersion measure is the equal-weighted standard deviation of accounts in the composite for the entire year. Dispersion and Ex-Post standard deviation is calculated using gross-of-fees returns. Policies for valuing investments, calculating performance, and preparing GIPS® Reports are available upon request.
